DETAILED ACTION

1. It would be of great assistance to the Office if all incoming papers pertaining to a filed application carried the following items:

1. Application number (checked for accuracy, including series code and serial no.).
2. Group art unit number (copied from most recent Office communication).
3. Filing date.
4. Name of the examiner who prepared the most recent Office action.
5. Title of invention.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 9-14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Marcoccia et al (6,169,761) in view of Haugli et al (5,991,279).

Marcoccia discloses an indoor unit (24) and an outdoor unit (23) coupled by a coaxial cable (46), for transmitting power, control and RF signals between the indoor and outdoor units through a coaxial cable and means for changing the center frequency no more than 400 milliseconds and means collecting status information. The system is TDD. (See col.4, line 32 to col.5, line 27 and figs.1 and 2)

Art Unit: 2631

Marcoccia differs from the claimed invention in that the cable is not a single coaxial cable as claimed in claim 1 of the present invention. However, Haugli discloses a wireless communication system comprising an indoor unit (50) and an outdoor unit (47) coupled by a single coaxial cable (48), for transmitting power, control and RF signals between the indoor and outdoor units through a coaxial cable. (See fig. 2) Thus, it would have been obvious to one of ordinary skill in the art at the time the invention was made to replace the coaxial cable of Marcoccia with the single coaxial cable of Haugli to reduce the system hardware and installation cost. (See col. 9, lines 40-56) The system of Haugli is TDD.

Response to Arguments

4. Applicant's arguments with respect to claim 9-14 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Chiocca, Jr. is cited to show a signal coupling apparatus comprising a signal coaxial cable.

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to T.Ghebretinsae whose telephone number is (703) 305-4777. The examiner can normally be reached on Monday-Friday from 8 to 5.
